

APIDIS User Tests

Video Surveillance Application

Who are we?

APIDIS is a research project funded by the European Union which aims at finding low-cost solutions for automatic production of video summaries for scenarios such as surveillance.

Why do we need your help?

A goal of the APIDIS project is to develop an application for video surveillance and test it on users, both professionals and users with no experience in surveillance. We are looking for volunteers to participate in these user tests.

When will the user tests take place?

The user tests will take place on November 15-16 at Barcelona Media, Diagonal 177, and at the Tànger Building of Universitat Pompeu Fabra, Tànger 122-140. Each test will take approximately 20 minutes.

How can I participate?

If you want to participate, contact Anders Jonsson (email: anders.jonsson@upf.edu, phone: 697480539). Indicate when would be a good time for you to do the test, and he will schedule the test for you.
